Officially, the Meiringen Air Base was first operational on December 1<sup>st</sup>, 1941. Its opening coincided with the year 1941 of the Second World War, a time when things looked pretty grim for Switzerland's further existence. What events have since characterised the development of this air base? One thing is sure, the differences between then and today are huge. Many things have proved their worth und have the same value today as in the past, but much has had to be adapted to the present time. Take some time and find out more about Meiringen Air Base and about the missions that the air base has to fulfill with its staff of about 230 during your stay at the Jet World Masters 2013.

## 21. Model Crates (Transport and Shipment)

### Team Members:

- Each pilot must determine and arrange for the most advantageous air cargo shipment company to transport their model crate from the home country to Switzerland and back to the origin.
- If you select a freight carrier such as FedEx, UPS or DHL, they will transport door-to-door.
- If you choose a passenger airline then consider that the transport of the model crates with pilot/team/supporters travelling on the same flight may cause problems due to airline security precautions.
- All airlines at the Zurich International Airport will charge a handling fee/terminal fee for processing the import/export of each crate.
- The crates should be scheduled for delivery by your own transportation forwarder to Meiringen Air Force Base no later than **August 16, 2013**.
- Crates arriving later than August 16 may be charged a higher delivery fee to the Air Force Base in Meiringen depending on the number of loads and the special circumstances.
- The return of the crates to their origins will be exactly the reverse of the original shipment. All return shipping fees with an Air Way Bill (AWB) must be done at the time of your original shipping arrangements at your home country.

### The model crate shipping labels to Switzerland should read:

*Given Name, Name of the Pilot*  
*National Team of .....*  
Swiss Air Force Base Meiringen  
Meiringen Air Base Command  
Model Storage for Competitors  
Jet World Masters 2013  
CH-3857 Unterbach BE

- A return address label for your model crate must be provided by each pilot at the conclusion of the JWM and affixed to the model crate by the pilot.
- Shipments by any other means or car/camper/truck must be handled directly by the model owner or pilot.
- Each pilot should investigate with their own country any advance registration required of the model to ensure there are no import or export issues. The pilot will want to ensure the model can be easily received in his home country on return shipment and not be subjected to a duty tax.

## 22. Spectators and Guests

- For the benefit of spectators and guests, special barriers and passages will be provided inside the model storage hangar to allow a view of the models, team activities and maintenance work from a reasonably safe distance.
- Only properly badged team managers, pilots, helpers, supporters, and specially badged media people will get clearance beyond the security fence inside the model storage hangar and special passages.
- Taxiway and runway access is limited to pilots and helpers and selected officials. Supporters are not allowed to enter the runway area at the contest site.
